The Winnipeg Soccer Federation is committed to providing a healthy sports environment. Our indoor facilities are over five stories high and are equipped with extensive ventilation systems that provide fresh air into the buildings. Our systems remove air from the buildings and provide fresh air every 20-30 minutes. Air quality testing has shown readings for ambient air quality equivalent to outdoor fresh air standards.

The WSF have also set new policies and procedures in place to provide the opportunity to play safely and physical distance as much as possible. These include wearing masks, having designated entrances and exits for the facilities and fields, additional hand sanitizer stations and increased disinfecting and cleaning practices. WSF staff are on-hand throughout the facility to provide guidance and answer questions.
